SUMMARY

Motivated B.Tech student specializing in Artificial Intelligence and Data Science with knowledge of Python, Machine Learning, Data Structures, SQL, and Web Development. Experienced in developing AI-based projects using OpenCV, Django, MySQL, and Scikit-learn. Eager to apply technical skills to solve real-world problems and gain professional experience through internships and project opportunities.

PROFESSIONAL EXPERIENCE

AI & Data Science Project Developer	DEC 2024 - Present
- Academic Projects 2024 – Present - Developed a Face Morphing Detection System using Python, OpenCV, and Machine Learning. - Applied image-processing techniques to identify genuine and morphed facial images. - Built a Fake Vote Detection System using Django and MySQL. - Implemented user authentication, duplicate-vote prevention, and automated vote validation. - Tested project modules, corrected errors, and improved system accuracy and performance. - Worked with team members to plan, develop, and present technical projects.	

PROJECTS

Fake Vote Detection System	Jan 2023 - Jun 2023
Aug 2024 – Dec 2024	
- Developed a secure web-based voting system using Django. - Implemented authentication and duplicate-vote detection. - Automated vote validation and counting using MySQL. - Tools: Python, Django, MySQL	

SKILLS
